Hi Again,

...And if that's not the case for you, you may want to catch up.

Take a look here first; [GME - The Story of Two Worlds : Superstonk (reddit.com)]([https://www.reddit.com/r/Superstonk/comments/u2btwr/gme\\_the\\_story\\_of\\_two\\_worlds/](https://www.reddit.com/r/Superstonk/comments/u2btwr/gme_the_story_of_two_worlds/))

Thanks to all for reading.

I wanted to start by saying that, because I wrote the last post specifically about the inconsistencies in the GME NFT marketplace scenery, and what that might mean, I may have missed the greater overall importance to this.

There are a couple things that I had left out of the last post that are relevant to the overall story here, so I need to back-peddle a bit. I will limit this post to those items, however, there is a bigger picture still, which I would like to explore further, down the road.

[GME NFT Marketplace.](<https://preview.redd.it/tvff0lx01kt81.png?width=1912&format=png&auto=webp&s=d52eb9bb874cdae46f6d79b4cc4ab22d69b02885>)

Last time, we established that our astronaut was pointing at both us, the USER AND, INDEPENDENCE, Louisiana, in the same instance. And Yes, it is spelled **\*\*Independence\*\*** (the burning tinfoil may have fried a synapse or two), thanks [Then\\_Contribution506]([https://www.reddit.com/user/Then\\_Contribution506/](https://www.reddit.com/user/Then_Contribution506/)) for the correction. So to go back to this, I left out the next most obvious connection. **\*\*ALMOST HERE\*\***. Those are the most prominent words on the screen, yet I missed tying it in. What does it mean? your guess is as good as mine, however, we can look at scenarios;

1. They are talking about the NFT marketplace just about being finished. this is quite probably the meaning...on the surface.

2. Apes and investors alike have just about launched into space. Okay. But we want to be almost on the MOON.

3. We are almost to financial independence.

I like the last meaning most, don't you? I mean, Gamestop will transform, the website will go live, and we will eventually get to the moon. If this idea wasn't a given for apes, who would still be here? As far as I know, we're not leaving. At least I'm not. ...And this will happen with or without a squeeze IMHO. Come on though, someone should have to pay for all the fuckery, no?

So why put that in big letters across the screen? Apes know it's coming. It's because it's not supposed to be scenario 1 or 2 for the Apes. I believe Gamestop has been providing guidance this whole time, It's just not the traditional Wall Street garbage of company plants, overpaid consultants and, shitty analysts anymore. They use tinfoil wearing, super-obsessive, autistic investors instead. Wall Street just doesn't have those tools.

So back to the 3rd scenario. As I pointed out last time, Independence was once known as **\*\*Uncle Sam\*\***. Now I'm not American (Hi from Canada) however, I remember Uncle Sam, you know, the "We Want You" guy? This guy drools patriotism and, what's more patriotic a twitter hashtag then **\*\*#GMErica\*\***?

Notice he's also pointing at us? Now I know you'll say this is just a character I pulled from the interweb to put in this post, however, remember how we got here. Our astronaut pointed us here! Weird huh?

Uncle Sam's history is obscure, however he has been a popular symbol of the US government in American culture, a manifestation of patriotic emotion and, has been used in military propaganda. If you dig deeper, popular legend suggests that he was derived from someone named Samuel Wilson, a meatpacker who supplied rations for American soldiers in 1812. Now this is where it gets interesting. \*\*There was a requirement in 1812 for contractors to stamp their name where the rations came from onto the food they were sending!\*\* (Sounds like a locate for every share! HMMMM... Decentralized exchange maybe?) To digress, Wilson's Packages were labeled E.A - US. (this post is not about any particular connection to E.A. games, but intriguing find none the less). Anyways, by the 1850's, \*\*Samual Wilson and Uncle Sam became virtually interchangeable.\*\* (relates to counterfeit shares for me...) .Uncle Sam's appearance became standardized in 1916, appearing on a magazine cover with the caption \*\*\*"what are you doing for preparedness?"\*\* Now wouldn't direct registering your shares, or at least a portion of your shares, ensure them in case of emergency?

WTF? All that from one wiki? Good lead Gamestop, SMRT!

I've parsed out what I thought was interesting, but here's the link anyways: [Uncle Sam - Wikipedia](https://en.wikipedia.org/wiki/Uncle\_Sam)

SO WHAT DOES THIS ALL MEAN? is it a call to direct register? Is it to point out synthetics? perhaps it was meant as a rally or, a warning. Perhaps Gamestop is planning to make a move where having your shares (or a portion of them) registered, is in your best interest. I'm not sure if anyone could know for sure, but why couldn't it be all of the above? \*\*It IS all of the above when you really think about it.\*\*

So why all the effort? I mean why make an entire website home page that also doubles as a treasure map? The time and effort put into this is NOT random, how could it be? I can only speculate, however, as per my last post, I strongly believe that there will be a shift from traditional finance into Decentralized finance. Maybe not all at once, however, once Gamestop dips in, I believe other companies will follow. I would like to suggest APPL, for one, because (the apple doesn't fall far from the tree)!

[Oh Captain, My Captain!](https://preview.redd.it/mzgc6s49mkt81.png?width=502&format=png&auto=webp&s=8b6a15b7a2dfc2e23f8bcaeec4f8100e37e062b3)

I'm out of time for now, so that will need to be saved for another day!

\*\*TDLR: Direct register or not, I believe Gamestop has been providing Guidance to Apes the whole time, just not through traditional means! To be able to gleam this much information from their webpage is absolutely mind-blowing and it cannot be random.\*\*

Again, Please comment, upvote, like, and share if you're jacked by this post. thanks in advance!
