So, out of curiosity I went to use the internet archive database to look at changes made to the citadel website, come to find out on 1/27/21 there were hundreds of changes to data on the site. A lot of the data is hard to track even when being given the html. It seems a lot has been masked and hidden from the current website.

My main objective was to find relationships between Citadel website and \$GME squeeze round 1. I stumbled up an immense load of html updates starting on page 12 of results when sorting by "from". The link to this data set is: [\[http://web.archive.org/web/*/www.citadelsecurities.com/\]\(http://web.archive.org/web/*/www.citadelsecurities.com/\)](http://web.archive.org/web/*/www.citadelsecurities.com/)

What to make of this, I don't know. But if anyone has the ability to scrub data for keywords or narrow down potentially relevant information, I am summoning you.
