I see people transferring (to CS) anywhere from 10% up to 90%.

I see lots of questions about selling from CS.

So, if CS fills, but people eventually sell, is there an opportunity to continue to DRS during squeeze, in compensation to those selling from CS, to keep pressure against loaning synthetics? If my DRS is in line just after its full, is it queued for one of you to sell, canceled outright?

Seems a sort of step by step of likely scenarios is worthwhile... last time such an article was written was pre DRS.
