Please support the new addition to DRSBOT that tracks the number of CS accounts per Ape. This recent update will greatly improve the accuracy of estimating the total DRS share count. Simply go back to your original CS post and comment:

!DRSBOT:CSx!

where x is the number of different CS account numbers you have. (Many apes have multiple account numbers).

If you don't comment CSX , no data is given to you at all. In other words, it's not 1 by default if you don't comment.

Special thanks to roid_rage_smurf and team!!

*****After collecting data from the first 200 apes that submitted a CSX number, the number of accounts per ape is 1.39. This reduces the 114,000 CS accounts based off of the high score to actually 82,014 unique ape CS accounts. (Maff=114,000/1.39)

This is why BOT and CS.net numbers were so far off from GameStop's earnings release number of 5.2M on October 30!!*****

GameStop's quarter ends January 29. We really need to make the CS number in the March earnings release HUGE!! This number could help drive FOMO. If you haven't DRS'd, why not?!? If you haven't DRS'd 100%, why not?!?

BE the change! Don't trust your millions to a broker. Don't give hedgies "one more day". Please spread the DRS word to the masses outside of Reddit and think hard about if your other investments would be better off in GME.

Destroy Rigged System

LOCK THE FLOAT!!!
