Hi guys, Im just wondering on what is the advantage of MATIC over loopring? I've heard that Loopring is more secured and is not a side-chain like MATIC (Im aware that MATIC is also moving to rollups). With the rumor that LRC is going to partner with GME, is there any competitive edge that MATIC has over Loopring? Im not shilling LRC, this is just a genuine question on MATIC's strength over LRC.
