Upfront smoothie here and apologize if this has been said before and credit to them. So basically we all saw the comment on the double squeeze including blockchain. When we are moved to the blockchain and it squeezes our Loopring wallet will be the new bank and hold (presumably) the new currency. They can't take that from us or stop it at that point! The only guaranteed way of getting a dividend is from computershare from DRSing right??? If so what are you waiting for if you haven't started the process?? Do you think you will get money from your broker on the ole busted ass US stock market. There are only limited spaces left and available.... If you guys agree, post to Superstonk not enough Karma.
