Ryan Cohen has shown us yesterday how the normal price discovery looks like if routed to the "lit exchanges" such as IEX. If you have FUDelity account, use their Active Trader Pro and do the following (below is just a screenshot on how to do it and not a proof my position).

1. After login, select Trade & Orders
2. Select Directed Trade Stocks & Extended Hours
3. Fill up the information below, then on "Route" use IEX.

Please try to avoid PFOF at all cost if you want to have a fair and free market with normal price discovery.
