as the headline says.

here is there last 13f filing from mid may.

<https://fintel.io/i13f/susquehanna-international-group-llp/2022-03-31-0>

just scroll through it and u will feel like ur a trading god.

here are some of their current holdings.

have fun and amuse urself, how bad a shf can perform

examples from filing: (showing only the buy price)

tesla = 1077\$

amazon = 3259\$

spy = 451\$

apple = 174\$

costco = 575\$

snapchat = 36\$

GME = 166\$

and so on and on and on.

shfs are not obligated to record puts on this fillings, anyways on this fintel link above u can see they have calls and puts on nearly every stock they hold!!!

it is just my guess but i think they hold calls and puts of every stock in ratio of about 5/4

calls and puts.

but it looks like they bought their longs on pretty high prices and bought puts on way lower stockprices.

that coul be the reason their actual filling says, they only have 0,5 billion in investments down from nearly 3 billion.

it fucking looks like susquehanna is in an spiral of death and about to implode.

for gme this would be good. as they hold about 5mio shares of gme. but nearly the same ammount of puts.

if i guess right them will need most of their longs to close their gme puts. leaving them with nearly no shares left of gme.

now u say, how is this good for gme.

i say, the have lended their gme shares multiple time to other shfs for shorting gme!!!

nobody can say how often each of their shares is lent out atm, but u can sure bet multiple and multiple times!!!!

so if them fuckers close their puts on gme with their longs. those lent shares need to be recalled. and as we know. atm there are no shares of gme to find even computershare needs days to find some shares if u buy direct in cs.

i bet if the mainstream stocks drop just a bit more susquehanna cant hold their liquidity up, marge will call and they have to close their positions... this could lead to the egnite of the rocket.!

about 5 mio puts on gme have to be closed. with bout 5 mio shares they have lent several times and wont be able to find them.

this will leave other shfs to close their shorts as well cause they need to give „sus“ their lent shares back...

this is a horrific spiral of unwinding fuckery.

i bet next week will be the beginning of the end for everybody who has actual a short position in gme.

tldr:

susquehanna is the real shithf with tons of bad investments and is on the edge of bancrupcy. and if they fall their gme puts have to be closed, with longs they have lent out so many times, that other shfs will also fall in a big fckn boom.

moon pretty soon■■■■

this is just my opinion and how i see things.

im smooth brain and dont know nothing bout finance. please be polite with slapping me
