Fellow Apes, TBH I'm gonna keep this real simple, normally a lurker / Digital Nomad and a cosmic pirate. I work digitally and trying to start a DAO so I have an opportunity to travel around the world for a living!! I travelled and lived in 92 countries (I can give proof for the mods), I'm riding with you guys from January. From the first subreddit and now here, just want to say I'm proud of you all retards, you guys are incredible and I'm happy to be a part of you guys.

They lost control over the whole situation, and in this moment where we have seen it all. now they are ready to do anything like spread False news Fear and Doubt.

Whatever happened yesterday, That's confirmed my confirmation bias. they had to drop the price because they are scared about the FOMOS, and it was coordinated, they released the article and controlled the price movement to get away from the real news and trying to control over the narrative. They know if the real announcement hit the market and FOMO's gonna jump to this bandwagon and they will lose control of the price and they don't want that.

\$GME is not for everyone, the measure of intelligence is the ability to change. You don't learn from smart people, you learn from idiots. A clever person solves a problem. A wise person avoids it. So be wise. Watch what they do, and then don't do it, its a test and it's only for the people who actually gets it.

You need to understand.

There is only one stonk, everything else is a distraction. I am not against of anyone or any stock but there will not be a something like GME again.

For the New Apes. We are a group of individuals, who believes in Science and Numbers. We come from all different backgrounds and professions, you will find a Rocket scientist here and also you will find someone like me but what makes us one is our research and DD's and our believe in this company. And yes we all love the stock.

You need to understand this.

1. They didn't cover in January, they stopped the sneeze and they have to buy it back. (SEC reported that. You can find that anywhere.)

2. Retails own the float, multiple times. (Follow the DD's)

4. If you hold enough it's a never ending infinity loop. Yes you are going to make a fortune. Hedgies are fucked.

3. You should only give fuck about 1 guy and his vision (RC) and cherry on the top is crazy amazing company(I don't even have GameStop in the UK but I like the stock). And I can feel it its way something bigger than what we are expecting. Just watch the show.

4. If you don't know about NFT's, please learn about it. It doesn't work like way MSM is narrating it. (I would love to answer any NFT questions)

5. Do not trust anyone, follow your own research and DD's.

6. And most important "FOLLOW THE MATHS". Trust me it works every time. Even if we are a multi planetary species one thing will always remain same, that's maths.

I don't know about you but I am waiting for Fuck You Money. So I can do something better to this world. I have checked all the DD's, read shit ton of different opinions and posts and I think I have enough wrinkles to ride this change, all of them who are still thinking about other stocks you guys still have time.

Remember we are all gamers, we love playing games for hours. And also you should know you are in one, You live in a 3D stimulation, there will be always the main characters and extras, be the character who actually has a story to tell.

as I said before we can't help everyone, but everyone can help someone. Kindness begins with the understanding that we all struggle. So be kind and nice to others. We don't see things the way they are. We see them the way we are.

Love you guys.

TLDR: Read it Retards.

we are sitting in a very violent position. We can drop for 10-15 points more or trading sideways for next 4-5 days but then Just UP, the more they drag this the break out will be more Violent and Bloody. (Source - Trust Me Bruv)

I smell blood in the water and sharks are circling around. To The Moon Retards I will see you there with a pint of Creamy Guinness. Cheers.

*Im too high, I might delete this later as I don't want any online fingerprint for the future AI and "yes I'm building one and yes I believe in Roko's Basilisk too" (if you don't know Please do not DuckDuckGo that)

To the moon lads
