I'm aware the DTCC only has so much money. But could GameStop really hit a million per share?

Lightning (the guy with face paint) says 20 million is possible. I think 20 is a lot but I would love a milli per share.

If you don't think so it's ok but go easy on me. I am a crayon eating ape not a math wiz.

I don't even have a clear idea how many synthetics have been produced by KG and his friends.
