As the title says, this is what I gather (my.. .and only my opinion) from the past few weeks

1- Some market Makers, hedge funds are fl*ck* to the neck...(lets not mention their names... but we have some idea of whom) so what do they keep doing ? Shorting and shorting like there is no tomorrow (they want us to think others are selling... how would we sell ... days before the 17th ?? we are retarded .. YEP we are.. are we stupid ? (I don't think so)

2- SEC, DOJ can't do SH*ck* right now... (it takes time to actually do stuff, and gather info.. etc.... etc..) and I guess that these mf*ck*s think like... " let's short it to oblivion...blame the market and the war, and at most we will pay a small fine... if... ifffff... they can manage to blame us " ... they do this because... the other option would be to leave the stock alone and the price going up and up... until the moment they would get a margin call... and it would be their last breath.

3- Also, I think they still hopeful that the Gamestop turnaround won't be sucessful , can you imagine them throwing the towel ? That's not going to happen, they won't let it go easily... it's a matter of life or death for them, specially for some of them a matter also of not wanting to go down from a stupid "investment" (AKA shorting as F*ck*) a dying brick and mortar retail shop ... that has been posting losses quarter after quarter

4- Yes, to be honest , Gamestop is posting losses quarter after quarter, but ... whoever follows the company can see that things have been changing , the company has been investing highy in inventory , human resources, future technology, partnerships, etc.(although investing in something doesnt mean it will actually work) ... what really make my tities jacked is the number of people leaving their well paying jobs in AMAZON, GOOGLE, MICROSOFT, CHEWY and so many others... to go to GAMESTOP... nobody leaves a safe , well paying job for a dying and without future company... only if they live in Arkham asylum...or Chicago (sorry chicago apes)

5- What am I expecting from gamestop this 17 th ? Not much... a better than last year 4quarter report ? Yes I am ... but anything else ? Maybe more about IMX or loopring partnerships (just a bit of clarification) and that is it... not going to be hyped about anything... I'm a long ape... dont' really care about short (no pun intended) -sight results

6- The price is wrong... why would I care about the stock price ? If they (market makers, hedge funds or whoever else can short without caring about following the rules) ... I only care about these prices to buy more :D ... and lower my entry point , and for that... thaks shitadel, Pabe Glotkin , Cteve Sohen, Gen Kriffin

7- To finish (and a lot more could be said... just live your life , don't care about the stock price, buy from gamestop, believe in the top management gathered and things will go well... don't be so stress and looking at the price all the time... that gives you stress and fear and panic and that is all they want... you believe in the company than just relax and let Ryan Cohen make us millionaires... and him gorillionaire!

Can't Stop, Don't Stop , GAMESTOP!
