Yes! I was thinking... we are reducing monetary supply of M2 by buying more and more of GME stock... and hodling (more than the entire float ... so many times) removing the money from circulation in the economy , we are indeed reducing the money printing (BRRRRRRR) that J. Powell has been doing... in fact we are probably postponing the "liftoff"... helping the inflation remain as low as 7.5% !  
I think we should be hailed by the government , the fed and all financial system :P ...  
Now ... fuel the rocket and let's GO \\*moon\\*
