THIS IS INFORMATION ON CONSPIRACIES. TIN FOIL HAT – ON.

My entire life, I have asked the question of “why?” and have sought truth and facts surrounding many of the large tragic events that have happened. Since GameStop has further exposed the extent in which people will go to for power and money, I wanted to put together some of the events where the main stream narrative still does not makes sense to me when considering the facts. My intent is to share these as a starting point for anyone else who wants to read into the details and judge for themselves. All of these events impacted finance in one way or another. (I would go as far to say these are all a connection or two away from GME – if not directly related)

World Trade Centers – September 11th, 2001
