I am going to speculate a bit but I find it quite interesting we got an AH spike of 30% and a 30% drop when market opens.

All the media attention around the NFT marketplace GameStop is building and the hype around it. Why? I believe they want to make the official announcement from GameStop weak. Hear me out. Basket swaps stocks going up too? Well the game is rigged we already knew that. They are trying to make people get away from GameStop and certainly don't want new people in. They want us to think we are losing the battle, playing with our emotions and making us feel weak. So why not hype all about NFT marketplace (simultaneously hiding FTD) and turn the narrative into "you know what? Retail doesn't care about the NFT marketplace, all they want is meme trading. RC plan failed. This is a joke company and has lost shareholders trust. There is no plan there never was etc" They want to make GameStop seem weak in public. Make it look weak.

We are strong hedgies and GameStop is stronger than ever, with exceptional management and yoy sale increase and jumping into new technologies and from the bottom of my heart I can tell you're fked. Have a great weekend apes
