DIY: How to DRS Transfer Traditional and Roth IRA shares from a brokerage account to Computershare without tax implications

****Complete the DIY in-kind distribution steps and in 3 - 5 business days your shares will be DRS'd and registered in Computershare without the need of a custodian.****

Then, you have 60 days to complete the rollover process with a Self-directed IRA(SDIRA) custodian of your choice(recommend true SDIRA custodian who is not a market participant), and without any tax consequences.

Once your GME IRA shares are DRS'd and registered in Computershare, the IRA shares are never unregistered, even throughout the rollover process.

Here is the list that has true non-market participant self-directed IRA custodian for your IRA!

True non-market participant self-directed IRA custodians don't hold or trade publicly traded securities so no chance of market fuckery.

My true SDIRA custodian is IRA Financial trust. They are on the list.

****Edit:**** ****It's possible to DRS your IRA shares even quicker.**** Thanks to Ape [u/QuaggaSwagger](<https://www.reddit.com/u/QuaggaSwagger/>) who had a conversation with Computershare.

He DRS'd his IRA shares in ****2 days**** and didn't apply the temporary stop, and his shares ended up in the same account.

Here is his experience.

"I knew the purchase date, share price and settlement date of the shares in question and when they were distributed and when they were DRS.

Given this information they were able to locate the shares I was looking for and advise me how to have the custodian reference them on the phone.

Edit: just to add more complete information, though I asked to have those identified shares moved to a separate computer share nonretirement account, I was told this was not possible, but that a separate account would be created upon receiving the request from the new custodian."
