Super easy!

I mentioned CS and GME and the rep knew exactly what to do! It took longer to get through the autoprompt than the conversation with the rep to set up the transfer! Checking back with Fidelity at the end of the week to confirm the transfer went through and then calling CS to check on their end.

Check the guide from u/da_squirrel_monkey if you have questions.

Super helpful!!

UPDATES:

Just called and confirmed the share has been RECEIVED!

I have to wait for the the account number to come through the mail, but you can also access this through their online portal with some personal info! Initiating another transfer for another share from Fidelity tomorrow!!!
