Last quarter was 50.8 mil and this quarter was 71.3 mil but in between we conducted a stock split. So is this quarter accounting for 71.3 mil ON TOP of the previous 50.8? If so then 50.8 mil is 203.2 mil and then add 71.3 making it 274.5 mil. If this is the case then we are $274.5/304 \text{ mil} = 90\%!$?

Am I wrong in this quuck math or is the 71.3 a reverted value to compare pre splividend?

DRS! We are almost there GME!
