I saw this somewhere else a while ago!

I want to know how much more gme shares you got today by buying up this exquisit dip. Comment with your number only and add „DRS“ next to it, if you already got them purple or they are on the way getting purple!

Lets show them SHF/MM that each way, let it be down or up, ends on the fckn moon!

I only have 5 shares, but they wont get them under 100.000.000\$!
