It sounds like Citadel will be able to kick the GME can until Christ comes back, so what's the plan? And don't say "BUY. DRS. HOLD." as that is clearly not working. Before I checked out and took a little break options were the devil/FUD, but now options are "The Way?" I am not a stock broker, day trader or any other financial worker so that is out of the question for me.

So, if the floor is \$69,420,420,420,420.69 when should we see \$200.00? I mean at this rate we will hit the floor when dinosaurs are back running the planet.

Downvote away, I just need to vent. Starting to think this is all bullshit.
