

Title: Here's the Kicker: These calculations only apply to the 125K retail investors partaking in locking up the 8.9 million. Of course, there are far more than 125K GME retail investors. In only one brokerage in Sweden (Avanza, not even the largest) there are 21K investors owning ~511,000 shares. WOWZA!!!

\$GME Shares		The big question ... of the 125K who have DRS'd, what percent of their total shares are DRS'ed?
Institutional Owners (13F; Whale Wisdom)	21,835,000	
Insiders; Yahoo Finance	13,751,000	
ETFs; etf.com	6,500,000	
Mutual Funds; fintel.io	7,300,000	
Confirmed DRS Shares (as of Januray 2022)	8,900,000	
\$GME Shares Owned:	58,286,000	if 100% of retail's shares are already DRS'd
FYI: Fewer than 76 million \$GME shares exist	67,186,000	if 50%, replace 8,900,000 with 17,800,000
	93,886,000	if 20%, replace 8,900,000 with 44,500,000
	138,386,600	if 10%, replace 8,900,000 with 89,000,000
	939,386,000	if 1%, replace 8,900,000 with 890,000,000
I'll tell you this much ... the number is likely much closer to 1% than 100%. Not only that, but retail is only buying & DRS'ing more every single trading day.		

Replying to [@avanzabank](#) and [@akramelag](#)

Correction so there is no misunderstanding: For now there are 511 178 stocks owned by around 20 902 users on our platform*
