What options have to do with my itchy anus:

One the one hand, nothing, on the other, everything (including a handful of butt cheek)

How so?

First of all, I'm not a financial advisor & this isn't financial advice, I'm simply a GME banana fiend with a fiendishly scrubby rectum

So, obviously, options have nothing to do with my gnarly blowhole, except being aggressive with either can cause massive bleeding

But, on the other hand, if I was to understand how to effectively engage with options at a time with low volatility, that would be like never worrying if my colon chute needs a scraping cos I'm already well versed in all things bowelish.

If I start anatomical study now while still steelwooling my winky browneye, instead of attending a clinic to get it checked out by specialists, I could in for some painful shit

Options are a great idea, if you know what you're doing. Anyone that tells you it's easy money is telling you the truth, cos it's easy for them to take yours if you believe them.

Also, anyone know a good clinic?

Thus spake NostradAnus.
