**GameStop** (NYSE:[GME](#)) stock the retailer providing games and entertainment products have been one of the most tradable meme stocks. The high and unusual stock price volatility makes its trading too risky and certainly not suitable for all investors. Shares of GameStop seem to have lost their previous erratic stock price movement as they [have a 3-month return of 2.84%](#) closing at \$119.57 on May 2. Why is this important for GME stock now? Because GameStop has lost its meme status at least for now with the wild price swings. This could mean that you could focus on the underlying fundamentals and expect smoother volatility, which is not bad. On the contrary, it is all about risk management, which is trivial for successful stock investing.

Have you ever wondered who was behind the meme stock craze for quite some time? Not just for GameStop but for other stocks too? According to Sallie Krawcheck, the co-founder and CEO of a trading platform for women called Ellevest, you [should blame men mostly for this irrational exuberance](#) in stock trading that sent GME stock having a 52-week range of \$77.58 – \$344.66.
