Hey everyone! hope you are doing well. I just wanted to share with you the charts I colored on to show you that we are headed to the moon this week. I believe the Rocket engines have been ignited and that our rocket is about to launch. Yes I know most of you think TA is useless. My average is about 42.0% of being correct. The last couple of weeks that has increased to 69%. None the less, I think it is time. When the MACD on the 1 week crosses, we will see Gamestop have significant gains. Well sure as shit, I believe it is going to cross this week and we will be on our way to the moon. I bet by 4/20 the price will be over all time highs. Of course none of this is NFA, I'm very retarded and I eat a shit ton of crayons. I'd like to show you the most BULLISH chart I have ever seen

[This is the 1 week](<https://preview.redd.it/4oke3pfeyyp81.png?width=1139&format=png&auto=webp&s=b4aac303de703c8ce330617805aae7c2f2bd2d64>)

The important thing I'd like to point out is the Purple Circle.

do you see the purple line touching the orange line? This is the start of a golden cross

I like to think of these as 2 fuses touching ready to blow up. The last time we had a golden cross crossover was in 5/24/21. it went from it went from 175 -> 344 in 2 weeks. there was another one that wasn't as explosive that went to 182 -> 252.

Well the BIG difference between this cross over and the other 2 is that GME has never been this oversold. As well as volume not being this high for over a year. The only 2 times where it was higher was Jan sneeze levels and the Feb run up. This cross over is going to be huge and I really hope everyone is still buckled up!

Stoch (orange) has never looked like this. The closest was the Feb run up. Right now it is showing a golden cross, going up like crazy and diverging

A/D (Blue) is going up

Aroon (pink) is also going up for the first time since 1/31/22

The Parabolic SAR has flipped (sorry I ate the crayon I was going to highlight this indicator) This is the first time it has flipped since July of last year

Gamestop has never looked like this before, it has never been this oversold before, We haven't seen volume like this since Jan/Feb of last year.

Overall - \\*insert tendieman song\\*

Right now GME is has closed above that 150 mark. Since they have t +2 days to settle, Monday and

tuesday is going to be lit. I think 200 + this week and even possibly test 250. I'm expecting major price action 4/15. I believe that is the week we will pass all time highs.

GME finally broke out of the dorito of doom and it looks like it is cleared for lift off.

MACD(purple) is going up and is green

Stoch (blue) - can't go any higher

A/D (yellow) has room to go up

Aroon (orange) is going up

PSAR (pink) - has flipped 5 days ago confirming bullishness

Overall - \\*ape noises\\* \\*jacked more then ever\\*

TARD: We are headed towards the moon this week!
