Now let's reorganise things so this starts to make sense:

Solid Snake = Legit Share

Liquid Snake = IOU Share

Solidus Snake = Short Share

Naked Snake = Naked Short Share

Venom Snake = Swap

I'll break it down further :

If you have a direct registered share of Class A Common Stock for GME, you own that stock in your name. It is legit. It is real. It is SOLID.

If you have a share of the same stock held in a brokerage, you are the beneficial owner but you don't actually own the stock, you just have a receipt, an IOU. Your stock is real but it isn't currently there, it is flowing with the market until you decide to sell it, it is LIQUID.

If you are shorting the stock, you're worse than a pleb, you're negating the value of the stock, you're creating a hedge with your gamble and thus your stock bet creates an opposing share. It is divided, it is the upside down, it is SOLIDUS (Printing A virgule; a slash.)

If you are selling shares that aren't accounted for you are naked shorting shares. Aka Phantom Shares. Your share holds no value. It is valueless, it is not real, it is NAKED.

I can't explain swaps here I'm too dumb to get my head around them but if you understand the rest you'll know this category falls under VENOM.

As for the rest I mentioned above, The Patriots in the game represent an elite organisation, think Illuminati. In this retrospect, the Patriots in this saga are those deeply involved with the fuckery.

Metal Gear are MSM for they are a tool with great power.
