GME Short Interest (Daily Fintel Updates)

This section uses the official NYSE-supplied short interest and provides some value-added metrics, calculated daily. Short Interest is updated twice monthly on set schedule, but float can be updated more frequently (although it does not change every day), so we provide daily updates of the Short Interest % Float for the last fifteen days. Days To Cover is calculated daily based on the most recent five day trading volume.

Update Frequency: Short Interest - Twice Monthly, Float - Daily (although changes infrequently) [Short Interest Publication Schedule](#)

Market Date	Short Interest (Shares)	Days to Cover	Float (MM Shares)	Float less SI (MM Shares)	Short Interest % Float
2022-02-09	10,998,384	3.74	62.52	51.52	17.59
2022-02-08	9,377,532	3.33	62.52	53.14	15.00

Short Shares Availability

This table shows the number of shares of US:GME available to be shorted at a leading prime brokerage. It is not the total number of shares available to short, nor is it the short interest.

It does not include data from other brokers or dark pools. It is a small sample, and it is useful for tracking the rise and fall in demand for shares throughout the day and weeks. It should not be treated as an absolute number of shares that are available to short in the market.

We update our database every 30 minutes but only display changes, in order to improve readability.

Short Squeeze Score

The Short Squeeze Score is the result of a sophisticated, multi-factor quantitative model that identifies companies that have the highest risk of experiencing a short squeeze. The scoring model uses a combination of short interest, float, short borrow fee rates, and other metrics. The number ranges from 0 to 100, with higher numbers indicating a higher risk of a short squeeze relative to its peers, and 50 being the average.

Short Borrow Fee Rates		
<p>GME / GameStop Corp. short borrow fee rates are shown in the following table. This table shows the interest rate that must be paid by a short seller of US:GME to the lender of that security. This fee is shown as an annual percentage rate (APR). Lenders are funds or individuals that own the security that have indicated to the broker that they are willing to lend it out. Dividends paid to a shorted security go to the owner/lender of the security, not to the borrower.</p> <p>We update our database every 30 minutes but only display changes, in order to improve readability.</p> <p>Update Frequency: Intraday</p>
