Okay, so I have started a few times to download the Gamestop Wallet Extension. I use Microsoft Edge Browser, and the Chrome webstore says (and Microsoft edge) both say the extension is compatible.

When I click "add to chrome", a pop-up window comes up, and says: "**Add Gamestop Wallet to Microsoft Edge? This extension can read and change all your data on all websites.*"

At this point, I get a little freaked out, and cancel the download.

I trust RC, I trust Gamestop, (Hell, They have all my money!) but it is just this phrase: "***This extension can read and change*** ***all your data on all websites.***" that freaks me out.*

Do I have anything to be concerned about? Does everyone get this same message on Chrome, or Brave browsers? I can always download Chrome and use it just for the wallet, if that is the best route.

Thanks for the help, and my apologies for what is probably an eyerolling noob question!

DRS, AND BUCKLE UP! ■■■■■■
