Body:

\*\*\*\\*disclaimer\\* This is NOT financial advise, nor any kind of advise whatsoever \\*disclaimer\\*\*\*\*

As some might be aware of stuff like [this](<https://unlimitedhangout.com/2021/04/investigative-reports/wef-warns-of-cyber-attack-leading-to-systemic-collapse-of-the-global-financial-system/>) and some even watched or heard about the documentary "Planet Lockdown". I've become very suspicious after I found one other video on bit\\*\\*ute called "Catherine Austin Fitts - Germ Warfare" (fast forward to minute 55). She's a former public official (served in the Bush administration) and a investment banker.

\\*) I'm very well aware of the fact that [she's](<https://solariadvisors.com/catherine-austin-fitts/>) been asked about the \$GME situation in particular, but since she mentioned dark pools and what in her view might have happened behind the scenes - it may could be projected to the \$AMC situation or even to crypto. That's why I've tagged it to the random discussion flair.

\*Or as far as I'm concerned: Retail seems to be in this together, no matter what you HODL AMC or GME or both. Even the crypto guys now seem to be aware that they're way more affected than they've ever thought they could be.\*

\*\*\*I. What's clear so far\*\*\*

1. HFs must cover.
2. greatest transfer of wealth (considered that MOASS won't be restricted in any way, shape or form)
3. transfer of power to the people (considered that tendies equal power)

\*\*Wait a second.\*\*

Did you really thought they'd let you get those tendies just like that?

Don't get me wrong. I'm a firm believer in the MOASS, regarding both GameStop and AMC. I also do believe there's no (easy) way out for HFs.

But there's so much crazy stuff going on in this world, that I've started to wonder:

\*\*What would they need in order to get away with all of this?\*\*

\*\*\*II. Let's just connect some dots.\*\*\*

1. The pandemic did hurt almost if not the entire working / middle class. Meanwhile, some guy, while preaching how dangerous and bad everything is, bought and just became the biggest individual owner of farmland in the US over night. (discounts anyone?)

Coincidentally, some bought (commercial) real estate in exactly those areas where some of the riots happened all of last summer, small businesses were shut down or went out of business after all.(again discounts, anyone?)

2. Further, the fear mongering wouldn't stop. So moving goalposts just long enough to quietly add some further topics (think e.g. climate, food, critical race theory) to the (imho) narrative, that humanity actually doesn't know how to live a proper life according to (their) views and therefore won't deserve and shouldn't be allowed having a self-determined, (free) life any longer.

3. All over the world, people get more and more dissatisfied with their governments. \*(In particular how they've handled the pandemic)\*. While it's been widely known that the ruling class for years has been

calling for the "NWO" or one world governance, nobody seems to question all of these pieces that together form a bigger, clearer picture of what is going on.

But how does this relate to any of the ongoing shenanigans at the stock markets that have been going on for the last couple of months?

Well maybe, but just maybe \\*hello irony\\* we've been divided (well before the whole pandemic: think democrats vs republicans) and soon to be conquered on purpose, without even knowing nor caring.

Or do we actually know and care, but have been distracted way too much by a disease, by losing our jobs, not knowing how to pay mortgage, college tuition or other weird stuff? (\*I'm not going to argue the potential dangers of said disease, or how somebody knows someone that suffered or even died because or from it. Just a reminder that about 99,x % survival isn't that bad.)\*

Distracted by all of this, while over night some individual became the greatest owner of farmland in the US, the very same that tells us how we the entire western population should and finally (if all goes according to their beliefs) will eat artificial meat, insects and so on. And the very same egomaniac that is trying to dictate to India's farmers what seeds, how much and when to plant and grow on their very own soil.

As if all of this wouldn't be enough, trying to block or shade the sun in order to control the weather which equals to control harvest is one of many highly suspicious activities that just show how much of a pain in the ass independent people are for some of the (seemingly in control of everything). \*(Totally aware of different views on how technology can and does improve agriculture. But just because they call it "saving us from climate change" doesn't mean those things won't have the potential to make things actually way worse. Think solar parks, wind turbines and the environmental affects those things do have.)\*

And while it might have been a widely huge success \*(globally)\* to distract, divide and conquer, they (\*or their AI)\* might have miscalculated the shit out of their plans and predictions \*(at least in the short term)\*.

\*\*\*III. Connection established\*\*\*

So what would be the ultimate step to make sure there won't be a (larger) transition of power \*(given that power equals tendies)\*.

What about cyberattacks? Blaming the usual suspects (Russia, Iran, North Korea) won't be too hard, right?

But not just one of those common cyberattacks. Let's call it the \*MOACA - Mother Of All Cyber Attacks\*. Power grids would be attacked and shutdown, not only locally but all over the world. Therefore the internet would be gone - again worldwide. The whole financial system would collapse within a short period of time.

\*\*\*IV. Coincidences?\*\*\*

There's this possibility, that they were planning all of this for years, even decades.

It seems that they had plans for this pandemic years ago, the next "virus covid-21" has already been mentioned \*(hospitals have been already informed that coming this fall the flu will hit back hard. Several scientists, doctors have warned that the vaccines might be the reason the virus mutates and gets stronger, more dangerous, so they've already been talking about the flu to maybe distract from other reasons - but we'll see.)\*

They have plans for the upcoming climate lockdowns and they have it for the grand finale, where (imho) the whole financial system will be destroyed by forces from within \*(not by some attack from outside)\*.

\*\*\*V. Moneyprinter goes brrr, but...\*\*\*

...there's no way they would've printed this much money (all over the world) like crazy (way before the pandemic), while in the exact same time trying to come up with an all digital system that won't just include health, but all of a person's private and financial data, which will be just the most comfortable way ever to

control, regulate or even punish the shit out of every single individual.

All this “health passport” stuff seems to be nothing but a huge distraction from what it’s all about. They want to control how what you do, how much you can spend, on what you’ll spend it and beyond.

Let me be clear. The MOASS is inevitable. But it is not guaranteed that they won’t pull some sort of “Oh, our bad, we just have been attacked, the internet is gone, the financial system collapsed” stunt and enforce their “you won’t own nothing and will be happy”.\*.

The only thing that might stop them (for now) would be retail investors by significant numbers receiving tendies (equals power) to opt out of the society we’ve known for decades that is without a doubt controlled [by a few](<https://www.lewrockwell.com/2021/04/bill-sardi/who-runs-the-world-blackrock-and-vanguard/>) corporations and by no means by “We the people”.

\*\*\*And that fellow apes is exactly what they (HFs, the 1% and some other weirdos) fear the most.\*\*\*  
Because even with all their fancy AI and robotic toys, they need the people more than people need them. And that imho is one of the reasons if not the very reason why all this fckery is happening right in front of us. Once a huge amount of people does have the tendies to support their local communities, starting their own companies or even their own local financial system and realise that there actually never has been a need for these so called elites that have been dictating what everyone else should do with his very own and very limited life, they’ll be gone for good.

\*\*\*But don’t you ever think that this will be an easy way just because there’s plenty of DD confirming the inevitable.\*\*\*

Get ready for really bad things once the MOASS begins and don’t expect life getting easier when these well deserved tendies sit in your cash account. There’s way more at stake than just the transfer of large amounts of money.

\*^(While it may seem too much tinfoil hat stuff, just check for yourself. It’s all out there in the open for everyone to see.)\*

\*\*\*Would be great to get some different opinions, additional thoughts.\*\*\*

TL;DR BUY HODL or HODL BUY whatever you prefer.
