****Watchdogs 2:****

The SEC (watchdogs) are not doing their job, so GME bulls (including retail) are rising up to create a financial revolution. Watchdogs 2 is a game that chronicles a technological revolt; placing specific emphasis on emerging technologies; and the effect it has in leveling the playing field for the average individual. Kind of like how many apes have been able to access the market by way of their phone; connecting millions of people to participate in the markets.

<https://preview.redd.it/opnh452lahn71.png?width=742&format;=png&auto;=webp&s;=6ca7eafe69b59ada8badd696895dbf952fdda916>

****Saints Row 3 and Saints Row 1:**** ,

Saints Row 1 + 3 were developed by the company Deep Silver.

****Deep Silver is owned by Koch Media****, founded by Franz Koch (former banker and founder of Koch International) and current CEO Klemens Kunderatitz.

(https://en.wikipedia.org/wiki/Koch_Entertainment)(https://en.wikipedia.org/wiki/Koch_Entertainment)

(https://en.wikipedia.org/wiki/Koch_Media)(https://en.wikipedia.org/wiki/Koch_Media)

The most important piece of information on this page is:

>Another ****game publishing label, focusing on**** [****simulation games****](https://en.wikipedia.org/wiki/Simulation_game), was announced in March 2015

Here is a 2019 article that highlights that Koch Media plans to ensure classic brand comebacks such as Time splitters and Shenmue III.

(<https://www.gamesindustry.biz/articles/2019-11-14-how-koch-media-is-ensuring-classic-brand-comeback-s-are-worth-the-wait>)(<https://www.gamesindustry.biz/articles/2019-11-14-how-koch-media-is-ensuring-classic-brand-comebacks-are-worth-the-wait>)

(<https://www.gamereactor.eu/koch-media-hit-by-simulation-fever/>)(<https://www.gamereactor.eu/koch-media>)

a-hit-by-simulation-fever/)

****You may be familiar with Farming Simulator, Cooking Simulator, Goat Simulator, Flight Simulator and a range of other simulation based games.****

Is it possible that Gamestop/RC is working with Koch Media (using their VR technology) to recreate classic gaming experiences such as Time-splitters and Shenmue to life through Virtual Reality? (who could ever forget playing Time-splitters at the arcade? Shenmue has a huge fan base).

Regardless, Koch Media is the largest distributor of Virtual Reality games, and there is an interesting history to simulations (and geometric fractals) that can give us even more context.

A basic fractal simulation principal is ****The "Koch Curve" developed in 1904****:

[https://javalab.org/en/koch_curve_en/](https://javalab.org/en/koch_curve_en/)

****Other mathematically determined fractal simulation principles:****

[https://javalab.org/en/category/math_en/fractal_en/](https://javalab.org/en/category/math_en/fractal_en/)

****Yet another reference to simulation theory and simulation based games.****

I think I'm observing a theme around ****simulations.**** How about you?

****Scribblenauts:****

Well, all of us love making crayon jokes, "making crayon charts", apes are always making jokes regarding eating crayons, scribbling charts. Also a reference to astronauts again because we are going to the moon.

****Sea of Thieves:****

Naked shorts are thieves, pirates, plunderers who steal from other ships (companies) at sea and sink the ship afterwards.

****Sega: Genesis Collection:****

The creation of a new financial system, a new world: aka Gmerica.

****Shadow of the Tomb Raider:****

Hedgies "raid the tombs" of their competitors. It is in this shadow that we have all been made aware of the history of the financial world; how we got here. It can be observed in all of modern history, from Jeff Bezos to Ken Griffin to Carl Icahn; all the way back to John D. Rockefeller's monopoly on the oil industry.

****Shadow Warrior:**** RC is cryptic, he has been encouraging us to be cryptic (because of Reddits censorship, which is why all my posts are half JPEG's now (a picture is worth 1000 words). All 3 of theses "shadow" games are telling apes to be stealthy, employ different strategies to beat the algo and censorship.

****Shadow Tactics:**** To be silent, and to keep your enemy guessing you must operate somewhat in the shadows, you cannot reveal your strategy until you know you've won. Again, encouraging apes to use "shadow tactics" to continue sharing information under the radar to avoid censorship.

****Shaq Fu: A Legend Reborn:**** Gamestop has been reborn. As have many other companies who have been "brought back from the dead" (as MSM would have you believe they were failing businesses; when in reality they were profitable and were misrepresented by hedge-fund owned media to ensure fulfillment of their thesis investments).

****Sims 4 + Star Wars**** dual pack: I believe this is a reference to simulations once again. I believe RC is

trying to tell us Gamestop is working on VR in a big way (possibly a VR star wars game as there was already the light saber VR star wars game created).

It really is funny to think about how this whole MOASS situation will cement Gamestop as the largest gaming company in the world; **right as we (as humans) are figuring out Virtual Reality technology.** This means that Gamestop will most likely corner the VR market.

****Sims 3:**** Another reference to simulation theory/the "simulation".

The Matrix is the most popular simulation theory movie, directed by the Wachowski's). You can see my post below that Decrypt's the release date of Matrix: Resurrection and explains why the Wachowski's are possibly working with RC on a Matrix MMORPG (which would be insane if it was exclusive). The Wachowski's had an active interest in blockbusters success due to their exclusive distribution relationship with Warner Bros. who made an exclusive deal with Blockbuster in 2010.

Wachowski-Blockbuster connection here: [https://www.reddit.com/r/Superstonk/comments/pke1z2/deep_dive_decryption_september_9th_release_of_og/?utm_source=share&utm_medium=web2x&context=3](https://www.reddit.com/r/Superstonk/comments/pke1z2/deep_dive_decryption_september_9th_release_of_og/?utm_source=share&utm_medium=web2x&context=3)

****Sine Mora**** (literally translates to "sin lives" in Portugese or "without delay" in Latin): "Sin Lives" within the stock market as we have been able to connect many financial institutions to evil acts such as ponzi's, frauds, naked shorting, mob and intelligence involvement. The number of decent people who have had their lives completely destroyed by the scumbags that operate in the financial world will be avenged by apes.

****The Sinking City:****

The Traditional Financial system and current financial order is sinking, indexes will sink when Gamestop squeezes. The upcoming crash will cause asset prices to sink (except for GME).

This also evokes a picture of time and age, wearing down that which was once relevant. a "sinking city" is collapsing on it's foundation, getting closer to a "sunken city" every day.

****South Park: The Fractured But Whole:****

Referencing his Mr. Hanky tweet from 2020; and the "they killed Kenny! You Bastards!" meme.

Both are from South Park. A show that has been critical (through comedy) of the ridiculous planning of our financial system. If you haven't watched the South Park episode "Margaritaville" I would highly recommend it.

****Snow Runner:****

Another **simulation based title from Koch Media which offers complete VR functionality.**

<https://www.youtube.com/watch?v=DAU8AhLvA68>

<https://press.kochmedia.com/nl/SnowRunner---Get-a-taste-of-future-Seasons-content-with-the-Year-2-Pas>

It is a game where you must "overcome extreme open environments" as a truck driver.

VR. the whole tweet is referencing VR. Gamestop will be making a huge play on the VR market. Mark my words.

****Sekiro: Shadows Die Twice:****

Hedge funds almost died during the January Squeeze but, because financial institutions paused buying, It provide them with another chance at life. the MOASS will threaten many of these hedge funds and financial institutions.

****Sniper 3+4:****

****Yet another reference to a title released by Koch Media.****

<https://www.gamespress.com/gameplay-fully-unveiled-in-latest-sniper-ghost-warrior-contracts-2-tra>

Koch Media will release the next edition of Sniper Elite, offering full VR functionality.

****Sub Nautica**:**

Another title that offers VR functionality:

<https://www.oculus.com/experiences/rift/993520564054974/>

Hedgies are going under, buried in debt, drowning under water in their short position. Their portfolio's are under water. It is common to reference people who are in debt as "under water".

****Slime Ranchers:****

Could be referencing the term "muckraker", which is a movement of investigative journalism that was pioneered by writer's such as Ida Tarbell (who wrote A Complete History of Standard Oil in 1904; exposing John D. Rockefeller's anti-trust/anti competitive practices) during "The Progressive Era". This movement has been revived by those of us apes exposing financial crime.

<https://en.wikipedia.org/wiki/Muckraker>

Apes are muckrakers. So let's keep raking the muck, so we can see underneath. Many may not understand how relevant Ida Tarbell and the muckrakers are. Bezo's was/is trying to do with Amazon; what Rockefeller did with Standard Oil (and Carl Icahn and KKR tried to do before Bezos but I will explain this in a more comprehensive DD).

****Skylander's Imagination:****

The stock will shoot to the land of the sky. Gamestop's price will go higher than anyone could imagine. Valhalla is also referenced in Norse mythology as the "land in the sky".

****Spyro: Re-Ignited Trilogy -****

Another reference to a game that has been "Remade" or upscaled from past console releases. Again, this is very similar to what RC has tried to do with Gamestop, "re-ignite" the brand of Gamestop to it's former glory.

****Every single game that is on this shelf references a specific situation that is taking place around this Gamestop saga**;** ****the Gamestop situation destroying the legacy financial system**.**

Super triple-double bonus level:

There is one more title which can be seen only partially on the left side of the picture; this took me a while to figure out:

It's a copy of ****Batman Arkham: VR :****

[2016 VR game of the year; Batman: Arkham VR](https://preview.redd.it/6uy8tf3u1hn71.png?width=240&format=png&auto=webp&s=3348aaea102b97e8f49c0c0b7d4179345d5a1eea)

https://www.gamestop.com/video-games/playstation-4/products/batman-arkham-vr/10132350.html?condition=Pre-Owned

****Batman Arkham VR**** was released 2016. The cover uses the same design used on the cover of the movie "Ready Player One"; which was released 2018. (more on Ready Player One in another dd but it will be revisited).

Why is this post part screenshots?

The reason I have screenshotted my recent posts is after heeding RC's message. He's been trying to tell us to communicate through pictures (since algo's can censor text entry information by value instantly using wide filter settings, but can't apply this same technology to jpegs).

The only way to move information without it being censored is through pictures; algo's are not advanced enough to scan JPEG data to infer word value at the current time.

Use pictures to make sure you cannot be censored by Reddit admins.

Confirmed Gamestop VR Q3 Conference:

reddit.com/r/Superstonk/comments/pl7sjg/gamestop_builds_new_app_to_host_2021_conference/

The above post confirms that Gamestop is using VR for there Q3 employee conference. I believe this will be a product test run for a virtual world. I believe no other company is better positioned than Gamestop to be the premier name in Virtual Reality gaming.

I think this entire tweet was always a way to tell us that Gamestop was/is moving into VR heavily as it develops into an enormous emerging potential market capitalization. I am incredibly excited to see what RC and the team can accomplish and feel a long-term play at the virtual reality space would be a terrific direction to take the company. They could outfit their performance centres with VR facilities and be one of the first movers into the metaverse space (especially with NFT's/blockchain specialists on staff; this would make sense).

Checkmate; just wait for my next DD.....

I would post this on Superstonk but reddit admins are blocking every single post I attempt to submit (even all JPEGs) to that sub, so I guess I'll stop frequenting it. We are in the endgame.

Power to the Players.
