Happy new year fellow apes. This year has been an absolute trainwreck. But I will not let Kenny win. I've witnessed so many short ladder attacks and ape bretheren be slaughtered and forced to pull out. My wife isn't as retarded as me, she tells me MOASS is fake. I can't even lie - it hurts, especially when she shows me her 30% gains in the SPY while I am still in the negative. I can't even show her the 697% gains YTD for GME because I got in during late January and she knows I'm in the negative. I try and show her all the DD but she says its just written by "no life dumbasses". It's actually even frustrating for me, because all the DD checks out but still it seems the powers that be don't want to see the small man succeed. It's like there is no way they will let a run up happen again, and they will do everything illegal to stop it. After all, who will enforce the rules on the rulers? I've been through so many ups and downs, but mainly downs. Started a new job and I don't know anybody there. Had my car break down on the side of the road. Family troubles too, my own momma turned my back on me - and that's my momma. There have been 3 distinct times that I truly felt MOASS would happen, but each time it seems the hedgies have come back stronger. But I know they will eventually run out of ammunition. What's important is that it costs me nothing to hold.

I see posts about what apes will be up to once MOASS happens, and it warms my heart to see so many of you willing to share your gains with others and help humanity. Hopefully you can forgive me when I say that I just don't think I will go that route. I've suffered a lot and just want to finally enjoy. When MOASS happens I will dump my wife and go about collecting model women on a yacht. And I will have sex with them. The end. My downfall will be the massive amounts of cocaine I will snort. I will be like that one guy in wolf of Wall Street (I can't remember his name, been eating too many crayons).

No matter what, GME to the MOON, I will HODL till I die. If I can hold, you can hold. With GME's NFT marketplace and lack of debt it is almost mind-blowing how this stock isn't \$1,000 yet. They are literally going to be the future. The best is yet to come.

P.S. This is NOT financial advice.
