Ok. Say I win a \$1,000,000, awarded in Bitcoin. What do I do now?

In this hypothetical situation, I need some fluid cash to advance my business (maybe \$20,000-\$40,000).

I also want to have a diversified portfolio. Own some ETH and DOGE. And hold a lot of Bitcoin.

I have very little in the stock market (\$3,000) so I would want to bolster my current stock market positions (GME, and about 4 other companies) as well as invest in a few more stocks I've had my eye on.

So how would you balance this \$1,000,000 into the following categories? Keep in mind that in this hypothetical scenario, the winnings are issued in Bitcoin.

Bitcoin:

ETH:

Doge:

GME:

Other stocks:

Cash Out in USD:

TL:DR: What would you do if you won a million dollars in BTC with no debt to pay off?
