Hello to all my fellow apes, so I've seen that it is possible to transfer out of revolut, frankly truth to be told I don't understand how this is possible to do but I've seen some apes succeeding in getting a Letter of Acceptance from Drivewealth in order for revolut to transfer shares, or option 2 using ACATS to transfer their shares outta revo. So today I contact their support and I get this standard ass answer from them, please help me how to proceed from here because I really wanna register my shares on computershare but these fuckers are making things complicated for no reason at all.
