Why GME Stock-Split announcement is bullish news

- Stocksplits generally increase value for shareholders, because it drives increased interest from retail and institutional investors.
- Post split it can drive value because the price to enter the position is lower, making it more accessible to retail.
- And possibly it could give a reason for a SHARE RECALL... that could launch us into andromeda.

Old:

Current shares outstanding: ~76M

Max shares outstanding: 300M

New:

Current shares outstanding: ~76M

Max shares outstanding: 1000M

So the max stock-split factor is 13:1...

The stock-split will be voted on at the annual shareholders meeting in June 2022.
