Holy \$SPRT, congrats if you been holding onto that one! I hope yall had a profitable week(or at least minimal losses). I'm always down to chat with other investors, so if you got a play you wanna discuss in the coming weeks or months hit up the comments!

Personally, I have a few trades I'm interested in entering next week. It's a debate though, my \$SLQT calls are shitting the bed. So now I have to decide whether I wanna let them ride or roll down and out. I am definitely eyeing some OTM calls on \$WKHS and hoping for a pop there. As someone else mentioned it may be time for Chinese stocks to begin their reversal, which has me looking at \$BABA. I am leaning most towards \$WKHS though, the price is attractive right now and calls are fairly cheap. Massive leverage=massive gains during a squeeze. Could pay off...
