Meet the Dumas family owners of the Hermes International Fortune:

[One of the richest families in the world. The Dumas Family.](https://preview.redd.it/9y6frfnrvau71.png?width=1051&format;=png&auto;=webp&s;=205835dca47a5f2368b51143757b8aa9937b3a78)

The Financial arm of the Dumas-Hermes fortune is the global equity company "Federated Hermes".

Federated Hermes have puts and shorts on GME. I wonder if they are.. say.... naked short?

[Federated Hermes; ironically listed under D.E Shaw on GME's Fintel page.](https://preview.redd.it/lwvpbis8lbu71.png?width=1357&format;=png&auto;=webp&s;=71aa608898bc4f8afaf39ea6318c39a4f0a7cd7d)

I was also able to locate this MSN article:

https://www.msn.com/en-us/money/markets/dead-right-about-gamestop-four-pros-recount-a-week-of-reckoning/ar-BB1dr0rw

****Stevie Chiavarone, A portfolio manager and equity strategist at Federated Hermes**** is asked of his opinion on GameStop stock and it's effect on the overall market downturn:

[Steve sounds pretty comfortable for someone who is about to lose it all.](https://preview.redd.it/vn3n78lda71.png?width=1042&format;=png&auto;=webp&s;=1181d8ac3d37706c9dcb736cf7c0f07ae550e81c)

Federated Hermes (FHI) stock suffered pullbacks during GME January gamma run up:

Looking at the chart history for Federated Hermes (FHI), we can observe correlations with GME price action:

<https://finance.yahoo.com/quote/fhi/>

During the dates of January 11th - February 22nd FHI declined from \$31.13 per share to \$26.72 per share. FHI was able to recover (along with bank and broader indexes) but since has suffered losses on dates coinciding with GME run ups.

Federated Hermes; and therefore the Dumas fortune, is seriously threatened by short position exposure to GME.

RC is warning one of many of the exposed hedge funds (and royally wealthy families) that their days manipulating the financial realm are numbered; and they should not be so confident that GME's effect on the market will be short lived (as Federated Hermes equity analyst claimed).

RIP DUMAS.
