Maybe Cohen is bailing on GME cause DRS is killing the bottom line. He's gonna sell bedsheet NFTs to middle america. 🦎

Me, because of the ignorant mindset of "assets have to be parked and can't leverage themselves" is simply stupid and naïve. Being long on a stock does not mean you have to buy it and do nothing. If you've even glanced at the stream over the last 6 months you should know that the ability for retail to make money is limited solely on retails inability to utilize tools within it's grasp. buying a put on a stock that you know is going to go down does not make you a 🌈 🐻 , it makes you a smart investor.

Dude hi-jacking you but the fucking flag wasn't a Jolly Roger.
Today is 3/22, it's literally skull and crossbones day. He's been telling us for months... I called it 5 days ago in atobitt's thread about tempering expectations.
Shoutout to [u/chocolatesharticle](#) for pointing out that RC's tweet was at 3:22 PST!

Eleventy billion D chess

Imagine trying to FUD about the sub dying and then RC just dumps on your broke-ass options-shilling prison-bound bird chest. RIP picklebitch.

Quote me on that shit

I wonder what percentage of the DRS crowd are actually just 17 investing their allowance and acting like the bread-winner at family dinners?

If I've said it once, I've
said it like 7.41 times:

Picklefuck is going to prison.

DRS your shit. Nothing's changed.

@JFresh Sixty Nine Cat **@gherkin** just sell them when we go over 90?

gherkin Today at 8:31 PM

I'll just sell CC's on them, the cb on the shares - my profit on the OTM puts is \$77 so it still lowers my overall. (edited)
