Is_self: False

■*IMPORTANT BUT NEEDS VERIFYING?* ■ Stumbled upon this stream from today -

<https://www.youtube.com/watch?v=zKNQsaXk6pM>

52:18 - some old bloke with *no computer* called Keith enters the chat and seems to predict live price movement a c c u r a t e l y? Sharing for ATTENTION in the hope others can apply this to other stocks and verify this come Tuesday?

\- Old Keith mentions a bid of 2100 on stocks under a dollar = ■Can this be verified/back dated?

If this is so, what the hell is it with Keiths? Whatever it is, he hasn't written any of this down - some one needs to interview Old Keith ASAP
