After weeks of waiting, I read that some people who initiated through TD bank in Canada still see their shares in their account but also in CS. I called Computershare US today, and the agent told me that the shares transferred from TD bank were received Oct 7, mail with my statement and tax form was sent out Oct 8.

I initiated my DRS transfer on September 17th — so that means it took 3 weeks (15 business days) for me.

The agent told me that if I don't receive my statement in a week or so I can call back for them to expedite it.

Edit: Update! shares finally removed from my TDDI account (Oct 16).
