Hey Apes! I'm wondering if any of you want to collaborate on how to take advantage on the technology advances happening right before our eyes. As GME is changing the digital landscape I believe that we can position ourselves in advantage by being a creator. I'm currently Pursuing a career in 3d modeling and would love to work with a group of apes. You want something model ? I'll help you out. I'm also willing to do it pro bono or we can make a deal. If you have a project and need someone to collaborate hit me up or post here. I'm also looking for mentor on the digital space. I'm currently learning blender.
