I would like to start by saying I believe in the GME DD I've seen from reddit and am an XX holder.

But what I am confused about is multiple comments I've seen saying that during MOASS the stock price could go into the millions and that even .X holders will be millionaires

Are people serious or is this just a meme? Is this based off anything?

I just don't understand how that would be possible. Not trying to be negative just seeking knowledge and trying to understand.
