When surfing around looking for gamestop nuggets, I found this article from dutch press agency NOS. <https://www.google.com/amp/s/amp.nos.nl/artikel/2384317-bijna-30-000-nederlanders-deden-mee-in-gamestop-hype.html> In this article there's a link to the website of the AFM. The conduct supervisor of the dutch markets.

[site](<https://www.afm.nl/nl-nl/professionals/onderwerpen/afm-market-watch>)

In the PDF of edition 3 of their monthly newsletter: marketwatch, in which they do a little Gamestop report about the periode from Januari 18th to Match 18th, are some interesting numbers. In this report they speak of 29.394 Dutch investors who had spent an average of \$ 11.532 on Gamestop stock. They bought for an average price of \$ 189.

So that means that in those 3 months, $(29.395 * \$ 11.532 = \$ 338.971.608) / 189 = 1.793.500$ stocks were bought by the Dutch.

That's quite a lot.
