Confirmed transfer today. I transferred shares from Fidelity Roth to Schwab Roth. Schwab then did the DRS to Computershare. They showed up as a different account number that was linked to my existing login for my cash shares that came from Fidelity.

There was a delay because I didn't know I had to upload a letter of intent ("Dear Schwab, I request and approve the direct registration of XXX shares of Gamestop (GME) from my Roth IRA account 123 to Computershare. Sincerely, Ape") to the platform which is quick. They say it can take 3 weeks, it took 3 days after a called and learned about the letter after nothing happened for 3 weeks.

Test batch in, more on their way from Fidelity to CS via CS.

Dear Fidelity, watch what happens when the apes adopt this...
