And there is something to be said about the role of shorting in cleansing the market

Yikes dude

You realize there are people on the other side of every action you take, right?

Yeah of course

I hope you give it some more consideration, then. It's never too late to join us. 😂

Hahaha I am against retail investors

Most people have no idea what they're doing

I even have those diamond hands on my icon. 😂

And uselessly disrupt the market like with Gamestop

Which will go out of business regardless of what happened

All companies go out of business eventually.

I do philosophy. So basically my job involves explaining what needs to change in our economic system. In other words, I'm the guy who tells people that hedge funds are fucked up. 😂

Hahah trust me I know they're fucked up!

Just a means of making money for me.

I actually prefer private equity

I hate the idea of public companies and the gross amount of speculation.

And the crazy valuations

So what else are you doing with life at the moment?

Yeah, but *how* you make the money matters. The things we do with money matter, so I try to do the best I can to only involve myself in the kind of economy I want, which is obviously impossible but worth a try for me. So I try to give my money to companies that are ethical, sustainable, vegan... you get the idea. I went hard on GameStop to fuck the hedge funds.

Haha GameStop is a controversial one

I mean the company is clearly shit
