Smooth brain, crayon licking, tit jacked baby ape here. This discussion is entirely based on speculation, and obviously is not financial advice.

Now, with all of the recent news and tweets from RC regarding BBBY and now BLIAQ, I wanted to pose the question to you wrinkle-brained, third-eye, zen apes: is RC signaling his army to advance on these other heavily shorted stocks?

There has been a lot of discussion on how zombie stocks are being used by SHF as collateral for swaps. From my understanding, our favorite movie store is being used in such a way. If apes were to BUY, HODL, DRS and lock the float of BLIAQ, would this prevent SHF from using it as collateral? Furthermore, what if RC decides to invest in BLIAQ and bring it back from the brink, just like he did with GME?

While BBBY is not a zombie stock, it is still heavily shorted. RC has already invested in BBBY, owning 9.8% of the stock. That's a major investment that wouldn't be made unless RC had a plan for BBBY.

Are these some of the companies that RC could assimilate to create Gmerica on the Blockchain? An online, one stop shopping experience to rival Amazon and supports individual sellers and investors?

I could be talking out my pink ass, but it's almost 3:00am at work and I'm curious. Let's discuss, and if I am completely off base please educate me!

Power to the Players.
