Linked Post Content:

Hi All!

I want to start by saying that I am not a researcher and I do not specialize in anything related to this post. I am just an average person with an attention for detail and an obsession with GME. When I first noticed it, I posted it on twitter, though it didn't get a ton of attention. It's difficult to illiterate a lot of information on that platform, I find. It has different flair that I do like though.

This is my first real attempt of anything remotely wrinkle-brained pertaining to GME or any significant post on reddit. I would encourage anyone to verify, refute or, add anything to the discussion, as applicable. I may be completely wrong but I like the hype anyways, I hope you do to.

When GME released their latest and current Beta, I was looking at their stunning home page. I wanted know where we were looking. I started in Grapevine, Texas, of coarse, but soon found that it wasn't there. I was in the right area though and, noticed quickly, that this is likely the Gulf Coast Area we are looking at.

[The GME Marketplace home page](https://preview.redd.it/x659nr2ng6t81.png?width=1912&format;=png&auto;=webp&s;=a395ee5b2d9c3021d0544d668c7e97fb981e2c44)

I'll break it down into parts, but it is also good to have the overall screenshot of The GME marketplace homepage from a PC (above). (I think it displays differently depending on your device, which is pretty cool in itself). This way, you can better see the whole scope.

Let's look at the planet in the background first. I propose that we are looking at the Gulf Coast Cityscapes at night.

[Gulf Coast Area Nasa](https://preview.redd.it/wa01t6jpg6t81.jpg?width=275&format;=pjpg&auto;=webp&s;=e03be38f4738c48224591003d6d091b1e8b63f26)

[Google Earth Gulf Coast Area NOTE: Houston \(\centre left\) and LaFayette \(\centre right\)](https://preview.redd.it/y1gb7l2tg6t81.png?width=1678&format;=png&auto;=webp&s;=f8f8ae20448fd85881cde46cef58c9a8082471cd)

[GME Marketplace - planet in the background NOTE: Houston \(\Left\) Lafayette \(\centre\)](https://preview.redd.it/v1mk9izug6t81.png?width=828&format;=png&auto;=webp&s;=85c7b29be3265dc396671ae1c82d352a2e7a6ff6)

Corporate needs you to tell them the difference in these pictures.

...It's the same picture, of coarse!

Or is it? While these may look the same, I had to rotate the above snip of the GME marketplace's planet 90 degrees clockwise AND, also invert it. It is a mirror of the depiction from their home page! (note the writing in the image above) Please also note the Sun. If the Gulf Coast is at the bottom of this picture, the sun is in the North. (mind you, The sun could be in the northern hemisphere and we're just catching a glimpse over the artic.) The sun rises in the EAST and sets in the West. Keep that in mind.

[Unaltered Snip from the GME Marketplace](https://preview.redd.it/dbnfkrqyg6t81.png?width=678&format;=png&auto;=webp&s;=60a0cba16234905972c2da6851c85c45555fb842)

Wait a minute! As seen in it's original form, the planet we are seeing in the background of the marketplace page is off axis roughly 90 degrees AND is mirrored to how we should see it in reality! The lights towards the sun side (left), suggest that the Gulf of Mexico is opposite (right), in the above photo. If this is all true, then this is not planet Earth we are looking at!

We'll come back to that in a minute...Intrigued yet? There's more!

Now let's look at the Astronaut more closely

[GME marketplace Astronaut - pointing at the user](<https://preview.redd.it/g8pyly01h6t81.png?width=985&format=png&auto=webp&s=39f01dc82088b85c90b66cedb346cae2dbcb82d5>)

Let's just note the moon right away!

Okay, now that that out of the way, it looks like he is pointing directly at us, the User. Now for the trippy part...

[Visor reflection also showing his arm pointing at a possible landmark?](<https://preview.redd.it/nozbfsy2h6t81.png?width=306&format=png&auto=webp&s=8f57cb2c53c7df70ae3c9f8879130ded851e9bfd>)

We also see the reflection of the cities below, in the visor here. So is this the same reflection of the planet we see in the background? I don't think it is. If have we established the planet behind is an inversion of reality, then this reflection should look like how we would see it normally, on a map. Instead, it is also inverted! This reflection would appear to be as you would expect it to be in reality. After all, a mirror image of a mirror image would make a normal image, right? Note that it seems to be reflecting the image on a different axis as well! Also, his arm is pointing away from the planet but still pointing to a location on said Planet? Lastly, there is no actual reflection of the void of space (on the left, as one might expect to see) in this image. Instead, you can almost see the end of the planet on top and on the right side of the visor, a thin black line...

Man, I should have paid more attention to mirrors in school! I'm no mirror expert, so here's a link for anyone that also is not: [<https://www.physicsclassroom.com/class/refln/Lesson-4/Reflection-and-Image-Formation-for-Convex-Mirrors>](<https://www.physicsclassroom.com/class/refln/Lesson-4/Reflection-and-Image-Formation-for-Convex-Mirrors>)

**\*\*And to any mirror Apes out there.... Let's hear it.\*\***

In the meantime, let's get back to where he might be pointing...

[Snip of the reflection pointing near Hammond, Louisiana with LaFayette \(\right\)](<https://preview.redd.it/4m1dv49qh6t81.png?width=121&format=png&auto=webp&s=021ef4e9c0111061e29845da609cf516f04c5195>)

[ New Orleans Area \(\Inverted to match the visor reflection.\)](<https://preview.redd.it/b7o0qbyth6t81.png?width=700&format=png&auto=webp&s=a26743dedc7aa71a6a266798e14f3cd53cbb4122>)

In the visor picture above, I believe his hand is partially covering New Orleans and, that he is pointing somewhere near Hammond, Louisiana, just to the North. I don't know if there is anything particularly special about that, maybe there is, however, further North (where I think he's Actually pointing), is a town called **\*\*INDEPENDANCE\*\***. We'll tie in it's significance in a minute. Note: this town was originally known as **\*\*Uncle Sam\*\***! Remember that whole **\*\*#GMErica\*\*** thing?

Getting awfully tinfoil around here... Oh No!... Anyways!

[New Orleans area - Independance \(\Top\)](<https://preview.redd.it/cgk00emxh6t81.png?width=700&format=png&auto=webp&s=b82ef7666a7a43ee516b87665746f7951902f4bc>)

Here's the Wiki if you want to find out more about this strange town. [<https://en.wikipedia.org/wiki/Independence>]

dence,\\_Louisiana](https://en.wikipedia.org/wiki/Independence,\\_Louisiana)

Time to tie it all together. If you're not up to speed on Gamestop's partnerships and/or future direction, stop now, read up and, come back. Where have you been all this time BTW?

I propose that:

1. **The Planet in background is the representation of the metaverse**, a reflection of earth, given the NFT marketplace and current or future (anticipated) partnerships with IMX and LRC, it's not hard to perceive.
2. **The reflection in the visor is actually a reflection of Earth**. If true, **then there are actually TWO planets** in this scene.
3. **If there are TWO planets, the MOON is in between** them.

...Insert Larry Cheng

[Larry Cheng - Twitter](https://preview.redd.it/rmpfke73i6t81.png?width=586&format=png&auto=webp&s=8541260517f8653c41df45e94bf9f3ed22905b88)

**What is GME doing? Split trough dividend! What would that cause? FIREWORKS!**

...Insert Byron.loopring

[HMMM.... #BEYOUROWNBANK ????](https://preview.redd.it/81lebsi4i6t81.png?width=586&format=png&auto=webp&s=46768f07814ba87f9178906d766f9b823b10d38a)

[Byron inviting Elon to the land of decentralized Finance...BULLISH!](https://preview.redd.it/unptomq5i6t81.png?width=582&format=png&auto=webp&s=7bb9af08a9302872c2a527b29223322f939a79ba)

**With this in mind, I would like to suggest that the potential split will be issued in dividends, for a spin-off division, named GME-E (using this only because I've heard that name being thrown around a bit) and, issued as a crypto token asset! Remember, LRC has a decentralized exchange and i believe they also have the patent for it...**

I don't know all the legalities or other **loops** involved with them actually getting this done, but it seems likely, if not at the very least, feasible. You can find lots of threads about Loopring elsewhere, so I won't go on further about them, except that **I also "like the stock"!**

Remember I told you we'd tie in **Independance**, Lousiana?

**TLDR : I believe that Gamestop is telling us that, by voting to allow a stock split, it will propel us to financial INDEPENDANCE when the two marketplaces collide, sending us to the MOON in the process!!!!**

[MOON SOON ... !!!!!!!!!!!!!](https://preview.redd.it/2j19iys7i6t81.png?width=360&format=png&auto=webp&s=2c2a72fdf388207cd7317a26ee212cdb7df7eacc)

Oh!... and then there is this, in case you needed more jacking of tits!

[Remove Before Flight](https://preview.redd.it/in1a2a99i6t81.png?width=447&format=png&auto=webp&s=2ac5a9df7f33ad48d38cd8ab471f8c8613db44de)

It appears our astronaut forgot to Remove this tag before Flight. These **"remove before flight"** tags were also known as **"red tags"**. **I guess he was launched without notice!** I suppose it could also be a **"pull to arm"** tag too. **And, even though I am in no way a financial advisor but eat crayons instead, a red tag is usually a deal right?** It could be all three...Stranger things have happened, just look around!

You be the judge! Here's the link:

[https://en.wikipedia.org/wiki/Remove\\_before\\_flight](https://en.wikipedia.org/wiki/Remove\\_before\\_flight)

I hope you enjoyed! With all the shills and bots around, if you like this post, Please like, share and upvote, to get it out there and into the community! As above, leave comments below. I'm not in a rush to respond, but I am curious as to others thoughts!

**\*\*#GMErica to the MOON!\*\***
