Maybe the PPT (Plunge Protection Team) stepped in again today? Maybe I'm crazy but I'm thinking how we come back from the huge downside of CPI today in PreMarket? As soon as CNBC reports, basically just seconds before (suspicious?) the market takes a nosedive and then at market open either bull trap or PPT saving the day, like immediately,. Basically the market said "NO!" to severe hemorrhage,. #GME buy on ComputerShare direct / hold,. IMO
