Hey guys, back again with another weird short story.■ This time bringing attention to big time shorter Jeff Yass of the Sus fund. I made the focus this time about this 'Great Reset' word being thrown around lately and I thought I'd synthesize all the good DD into a conspiracy focused short story about the upcoming great Economic Disaster ahead of us.■ Like always, I made some of the music/art along with borrowing a few pieces from other artists. I had a fun time making this and hope this gives you some light hearted fun over the holiday weekend. Please enjoy. ■
