Key Points

- GameStop stock is in a downtrend.
- In a downloadable game market, GameStop lacks significant competitive advantages.
- GameStop appears headed for flat revenue growth.

Motley Fool Issues Rare "All In" Buy Alert

GameStop ([NYSE:GME](#)) quickly became one of the hottest meme stocks during the pandemic. Since mid-2020, it has gone from penny-stock status to a high of more than \$480 over a six-month timespan.

However, struggles have brought volatility, and amid mounting losses and declining popularity, the [retail stock](#) has fallen steadily over the last three months. But rather than looking for a buying opportunity, investors may want to consider avoiding GameStop regardless of what happens.
