I don't know how unique my experience is here but I thought I would post a quick rundown of how I funded my GameStop wallet. The issue I was having was my credit card wouldn't allow me to buy crypto with my credit card. I ended up buying ETH in a wealthsimple crypto account and then withdrew the coins to my GameStop ETH layer one wallet. Transfer only took a couple minutes and was super easy.

In case you need a quick walkthrough:

- Buy ETH through wealthsimple
- In the wealthsimple app open the "move" tab at the bottom
- select the "crypto" tab at the top
- Select "withdraw"
- Enter your wallet address from your GameStop wallet (I found that wealthsimple couldn't recognize the GameStop wallet QR code, maybe it is too new??)

That is all.
