I don't want to talk bad about CS, but their password recovery services are terrible and there's no way they can help me access my 1099 before tax day.

Since I only have one type of security in CS (GME), is there any way I can calculate my own 1099 by hand using:

- the number of shares transferred (XXX)
- the date of the transfer
- the price on the transfer date
- the price at the end of the year

Have any of you apes done this?
