Linked Post Content:

Opinion only. Never advice.

****TL;DR:****

>****Part 1: Gamestops stock split in the form of a stock distribution**** was a master move. Open the link to the Tesla comparable to see the 6000%+ increase they had with the same strategy - with their having had less shorts! Plus, the shares are more affordable and synthetic/naked shorts have been multiplied. Likely only step 1.

>

>****Part 2. A dividends/token unit related to GameStop's marketplace**** as a follow-up to the stock split dividend actually forces the shorts to close. Checkmate! Check out the links to see the considerations!

>

>****Part 3: Direct Registration of Shares (DRS)**** helps coil the spring and can help INTESIFY the squeeze.

Part 1: GameStop's stock split in the form of a stock dividend:

[GameStop is not an ordinary stock, nor is it a failing brick-and-mortar retail chain like Wall Street previously thought. It is a very well financed, established growth company, with grand plans in the foreseeable future. As GameStop moves forward with its ecommerce and NFT marketplace the potential for this company rivals market giants like Amazon, Apple, and Meta (Facebook, Instagram etc)](https://www.reddit.com/r/Superstonk/comments/tw641b/gamestops_bull_thesis_gamestops_history_due/?utm_source=share&utm_medium=web2x&context;=3)).

DD supports that GME had *reported* short interest over 220%, that the s[HORTS never closed](https://www.reddit.com/r/Superstonk/comments/too38h/wondering_what_all_the_hype_is_about_gamestop/), and there are likely hundreds of millions to billions of naked/counterfeit shares in existence. It is reasonable to assume that R.C. was aware of the extensive shorts and manipulation of GME before buying his first share and that he has had a plan from day one to eradicate the shorts. How else would one explain the fact that [hundreds of talented executives](<https://gmedd.com/transformation/gamestop-bags-chewy-vp-of-engineering/>) have jumped ship from thriving tech companies like Chewie and Amazon to join GameStop - *with the majority of their compensation to be paid in stock shares.*

****A comparable look at Tesl's stock split in the form of a stock dividend. What could this mean for GameStop. Spoiler Alert. \$\$ It's HUGE!****

[*https://www.reddit.com/r/Superstonk/comments/vt5q45/gamestop_has_announced_a_41_stock_split_in_the/](https://www.reddit.com/r/Superstonk/comments/vt5q45/gamestop_has_announced_a_41_stock_split_in_the/)

****How the stock split via dividend worked, and how to confirm whether your dividend shares were processed correctly. What's next?****

[*https://www.reddit.com/r/Superstonk/comments/wer2x9/how_the_stock_split_via_dividend_worked/

and_how/?utm_source=share&utm_medium=web2x&context;=3*](https://www.reddit.com/r/Superstonk/comments/wer2x9/how_the_stock_split_via_dividend_worked_and_how/?utm_source=share&utm_medium=web2x&context;=3)

****Sidebar: What about the APE (Authorized Preferred Equity) Unit? For those questioning would it have been better? Answer = Absolutely Not!****

>Another company CEO announced this week a plan to issue a dividend to all common shareholders in the form of preferred equity units under the symbol "APE." One Ape unit will be granted for each existing common share, meaning that close to 517 million new Ape units will be created. This leaves 'the company' with close to 4.5 billion remaining units that could be sold to raise capital, *but this would dilute the value of existing shares*.

The CEO tweeted "Candidly I see no evidence so-called fake or synthetic shares exist. But many of you disagree. This preferred equity dividend goes ONLY to company issued shares. So it will have the impact of a "share count" or unique dividend many of you have sought."

IMO: The DTC will likely have the brokers credit shareholders and internalize any units that are short - while the hedge cuks immediately borrow/counterfeit the APE units to cover any synthetics. In principal, while this new issue should expose any fraud, it will probably just create more.

GameStop's stock split in the form of a stock dividend is and was a brilliant move, making \$GME shares more attractive for new investors plus creating significant pain for the synthetics through the distribution of additional shares - and was likely just the first step towards eradicating the shorts. It is probable we will see some type of Crypto / NFT Marketplace related dividend / token / spin off before this is all said and done.

Part 2: Checkmate! A potential Crypto / NFT carve-out or digital dividend is a consideration subsequent to this recently announced stock split dividend:

In *chess*, the *fool's* *mate*, also *known* as the two-move checkmate, is the *checkmate* delivered after the fewest possible moves from the game's starting position.

Hypothetical: Consider that (1) GameStop implements the stock split dividend significantly increasing the number of synthetic shares outstanding, and then (2) follows this with a Crypto/NFT based dividend - similar to the court precedent set by Overstock's issuance of a 'digital dividend'. The foundation for this has already been laid out by GameStop as highlighted in it's 2020 Prospectus.

>*GameStop could issue a dividend / token / carve-out related to their NFT Marketplace division, issued as NFT units'. Shareholders would receive an NFT 'unit(s)' for every \$GME share(s) they own. Any market participant that holds a short position in GME would need to provide an NFT 'unit' for their counterfeit shares - which of course they don't have. If the NFT 'unit' is issued by GameStop combined with \$GME shares 'non-transferrable for a specified period of time', in such a way that shorts cannot substitute a cash equivalent for the unit offering - the shorts will be forced to cover! 'Checkmate'!*

From GameStop's Prospectus: https://news.gamestop.com/node/18961/html#supprom192873_24

"We may issue units from time to time in such amounts and in as many distinct series as we determine. We will issue each series of units under a unit agreement to be entered into between us and a unit agent to be designated in the applicable prospectus supplement. When we refer to a series of units, we mean all units issued as part of the same series under the applicable unit agreement.

We may issue units consisting of any combination of two or more securities described in this prospectus. Each unit will be issued so that the holder of the unit is also the holder of each security included in the unit. Thus, the holder of a unit will have the rights and obligations of a holder of each included security".

****These units may be issuable as, and** ***for a specified period of time may be transferable as, a single security only,** rather than as the separate constituent securities comprising such units." \[*\]*Note, this**

would mean that the newly issued units could not immediately be bought or borrowed to manipulate / cover missing positions of the new issue - effectively forcing the shorts to CLOSE their positions**\]

Worth the read: Spin-off, carve-outs, mergers and more:

5. [[u/hottodoggu2](https://www.reddit.com/user/hottodoggu2/)](<https://www.reddit.com/user/hottodoggu2/>): One purpose of increasing the share number to 1 billion from 300 million, can be a stock-for-stock merger. I can't foresee any other reason why this would be needed, unless Gamestop were lining up something huge. \[can't link, can find the post in user profile\]

Part 3: Direct Registration of Shares (DRS) helps coil the spring and can help INTESIFY the squeeze.

If GameStop issues a crypto based dividend or token like an NFT unit to shareholders, and it is non-transferrable as cash or equivalent - then short positions are *forced* to buy back their short positions and CLOSE their positions in full. No just covering, no manipulation, and forced closure with lack of shares available equals true MOASS. However, this is not a given and not something *retail* can control.

DRS your shares to Computershare = Direct Registration of your shares in your name reported direct with GameStop = Removal of shares that MMs and SHFs can manipulate!

>***The** **only** **way** **retail*** **can control the \$GME narrative is through DRS. This means getting your eligible shares direct registered, and getting the word out beyond reddit to other GME holders to get more shares DRS.**

The options:

(1) DRS shares to remove shares from the DTCC, reduce liquidity and the amount of shares that short market participants can borrow against and manipulate, and trigger margin calls equals short squeeze.

(2) DRS & Hold, then sell only what you need to during squeeze resulting in ***not enough sold for Shorts to*** **close** their positions equals MOASS.
